Rev Up Training on What You Need, When You Need It

Every client is different. That's why **Rev Up** recommends a **custom on-site training** program to target your specific training requirements. On-site customized training can save you valuable time, especially when your training needs don't fit into a standard off-the-shelf course. Whatever your current challenge is, be it a new software application, encoding video, switching editing sytems, Rev Up Transmedia will
be there for you!

We begin with an **assessment** of our clients' needs and make **specific recommendations** as to what the most
effective training program
would be to reach your production and post production goals. The training is conducted in
hands-on intensive sessions
, simulated to re-enact
real-world situations
. Your staff will learn in the kind of environment they will be working in and be ready to
face any challenge
.

We can train on **any software** package and any piece of equipment, and the training schedule can be very **flexible** depending on your facility's production requirements. If **budget** is a challenge, let us know what yours is and we can design a training program that will fit it. We also have a
portable computer classroom

which we can bring to you! Think of Rev Up as a
one-stop shop
for all your training and consulting needs.

Below are some of the **custom training programs** we have developed for our clients. Remember, training is the **biggest investment** you can make in your staff.

Multi-Media Training

Need training on **software packages** (such as Apple, Adobe, Nuke, Microsoft) or p**roduction equpment**
(such as servers, cameras, lighting)? Our
certified instructors
can guide you from any level to where you need to be. You will be in very good hands because many of our instructors are on the
Beta teams
for the software developers.

Final Cut Pro for Avid Editors or Avid for Final Cut Pro

[illegible] **Avid to Final Cut Pro** [illegible]

Final Cut Pro X for Final Cut Pro 7 Editors

With the release of **Final Cut Pro X**, you may find that the new **editing paradigms** are slowing down your FCP 7 editors and staff. Don't let them
waste valuable time
simply trying to work out how to get a job done on the new app.
Empower your editors
with some on-site training that will invigorate your entire post production process and get the most out of Final Cut Pro X.

Contact Us

News Photographers Editing Training

In today's **news world**, oftentimes the **journalist** is a **one-person band**. They have to **produc e, shoot and edit**
.
CNN
has called on
Rev Up Transmedia
numerous times to
cross-train
their very
experienced shooters
to become editors as well. Rev Up can help you
expand your creative staff's abilities
without having to hire anyone new!
Just ask CNN
!

Contact Us

Adobe Training

Is your staff using **Photoshop**, **AfterEffects**, **InDesign** or other Adobe products to the **max**? Even your staff with experience on any given app may not be are using it in the
most efficient
or
creative
way possible. Our
expert Adobe Certified
trainers will have heads spinning when your employees see how much more they can do with Adobe's software packages. Your staff will
thank you
for this one!

Contact Us

High Definition Training

Does your staff know **HD video**? We custom designed a **one-day seminar** on **High Definition** for **Disney** when they switched their cable networks from **analog to digital**. No matter what **changes** your company is planning to implement, let us help you with your transition and get your staff **reved up**
