# Join the Revolution

REV UP transmedia

**Energize. Forward. Thinking.**

**Weynand Training International** has been on the **cutting edge of technology** for over 25 years. With each new video industry **software release** or **equipment upgrade**, Weynand Training has **taken the lead** to provide quality training via on-site consultations, in-class course delivery, and of course through the Apple certified courses we author. We have had a long, **successful career** and we value that **history** and the **relationships** we've built along the way.

But there is a **revolution** going on. We didn't start the revolution, but we're joining it! As we look at the **changing tides** in both the entertainment industry and technology, we've decided to take a **giant leap** forward. The new energy that our

**mobile app development**
and
**custom online training**
has created over the past two years is expanding our reach beyond the four walls of a classroom educational environment in the direction of helping others
**create**
,
**produce**
, and
**deliver**
their own content using our mobile apps and eLearning solutions. In fact, we are so energized and
**revved up**
that we are making a formal change in our company title.

We are pleased to announce that **Weynand Training International** is becoming **Rev Up Transmedia** .

## Create. Produce. Deliver.

While we continue to create **customized on-site training** and produce our own **in-class courses** , **Rev Up Transmedia**
will also
**develop mobile**
and
**e-Learning solutions**
for any educational or marketing content. Our apps and services will support you or your customers in the field, on the go, in the office or edit bay, and across the table from a client as you deliver your marketing presentation or record an interview. Today,
**every company**
in
**every market**
needs to
**rev up**
their content or deliver it in a new way.
**Rev Up Transmedia**
is ready to lead and guide you along the way.
