

## Rev Up Training on What You Need, When You Need It

Every client is different. That's why **Rev Up** recommends a **custom on-site training** program to target your specific training requirements. On-site customized training can save you valuable time, especially when your training needs don't fit into a standard off-the-shelf course. Whatever your current challenge is, be it a new software application, encoding video, switching editing systems, Rev Up Transmedia will **be there for you!**

We begin with an **assessment** of our clients' needs and make **specific recommendations** as to what the most **effective training program** would be to reach your production and post production goals. The training is conducted in **hands-on intensive sessions**, simulated to re-enact **real-world situations**. Your staff will learn in the kind of environment they will be working in and be ready to **face any challenge**.

We can train on **any software** package and any piece of equipment, and the training schedule can be very **flexible** depending on your facility's production requirements. If **budget** is a challenge, let us know what yours is and we can design a training program that will fit it. We also have a **portable computer classroom**

which we can bring to you! Think of Rev Up as a **one-stop shop** for all your training and consulting needs.

Below are some of the **custom training programs** we have developed for our clients. Remember, training is the **biggest investment** you can make in your staff.

### Multi-Media Training

Need training on **software packages** (such as Apple, Adobe, Nuke, Microsoft) or **production equipment** (such as servers, cameras, lighting)? Our **certified instructors** can guide you from any level to where you need to be. You will be in very good hands because many of our instructors are on the **Beta teams** for the software developers.

### Final Cut Pro for Avid Editors or Avid for Final Cut Pro

[Contact Us](#) We provide on-site training for staff transitioning from Avid to Final Cut Pro and provide the most  
**Final Cut Pro X for Final Cut Pro 7 Editors**

With the release of **Final Cut Pro X**, you may find that the new **editing paradigms** are slowing down your FCP 7 editors and staff. Don't let them **waste valuable time** simply trying to work out how to get a job done on the new app. **Empower your editors** with some on-site training that will invigorate your entire post production process and get the most out of Final Cut Pro X.

## News Photographers Editing Training

In today's **news world**, oftentimes the **journalist** is a **one-person band**. They have to **produce, shoot and edit**

.  
**CNN**

has called on

**Rev Up Transmedia**

numerous times to

**cross-train**

their very

**experienced shooters**

to become editors as well. Rev Up can help you

**expand your creative staff's abilities**

without having to hire anyone new!

**Just ask CNN**

!

[Contact Us](#)

**Adobe Training**

Is your staff using **Photoshop**, **AfterEffects**, **InDesign** or other Adobe products to the **max**?

Even your staff with experience on any given app may not be using it in the

**most efficient**

or

**creative**

way possible. Our

**expert Adobe Certified**

trainers will have heads spinning when your employees see how much more they can do with Adobe's software packages. Your staff will

**thank you**

for this one!

## High Definition Training

Does your staff know **HD video**? We custom designed a **one-day seminar on High Definition** for  
**Disney** when they switched their cable networks from **analog to digital**. No matter what **changes** your company is planning to implement, let us help you with your transition and get your staff **reved up**

[Contact Us](#)

## Government Training

Recently, we trained the **Forensic Department** of the **FBI** on how to clean up audio files to help them with their **evidenciary process**. **Rev**  
**Up Transmedia**  
qualifies as a **diversity business**  
and is **registered with CCR**
